

E-Zee Aqua[®] Supreme Topping

~ A 20 micron Water Soluble Topping

E-Zee Aqua[®] Supreme Topping 20 micron is a water soluble topping that prevents intricate parts of the design from sinking into the nap or pile and getting lost. The crispness of a design can be enhanced as well, especially when using a thinner 60 or 75 weight thread. Use on top of high profile fabric such as fleece, sweaters, corduroy and other soft knits.

How to use Water Soluble Topping

1. Cut a piece from a roll or use a piece of pre-cut E-Zee Aqua[®] Supreme Topping to fit your hoop size.
2. Hoop by placing on top of the garment, or you may simply lay a piece on top prior to embroidering the design (using tape to hold it in place may be necessary).
3. Embroider the design and remove the embroidered item from the hoop.
4. Tear off the excess topping and wad it into a ball.
5. Using a steamer or spray bottle with water, moisten any left over pieces of topping on the design, giving it time to become tacky.
6. Moisten one side of the excess ball of topping until it is tacky (you may need to add more topping to make the ball big enough to work with).
7. Finish by using what is known as the “bubble gum” method to remove the left over pieces of topping on the design by dabbing at them with the tacky side of the ball of topping.

Available in these sizes:

Pre-cuts - 250 pieces per pack

- 5” x 5”
- 7” x 7”

Rolls

- 6.5” x 110 yards
- 6.5” x 1100 yards
- 10” x 110 yards
- 23” x 25 yards
- 23” x 110 yards
