

E-Zee Tear[®] Soft

~ *A lightweight Soft Tear Away Stabilizer*

E-Zee Tear[®] Soft 1.5 oz. is a lightweight soft Tear Away stabilizer. It tears away easily with minimal stress to the fabric and embroidered design. When torn away the fuzzy micro fibers that remain will continue to soften over time and wash away during normal laundering.

Great for use with small and medium size designs with light to medium density.

Use with tightly woven materials like terry towels, napkins, linen, denim, jackets, canvas.

How to use Soft Tear Away Stabilizers

1. Cut a piece from a roll or use a piece of pre-cut E-Zee Tear[®] Soft to fit your hoop size.
2. Hoop by placing the stabilizer underneath the garment.
3. Embroider the design and remove the embroidered item from the hoop.
4. Tear the excess stabilizer away from the design. Remove as many pieces from inside the design as possible.

Please Note

When removing E-Zee Tear[®] Soft, begin by pulling the excess from where there are points, such as corners or thin columns. Tear from the outer edge in towards the design, which will produce a minimum amount of pressure and the least amount of distortion to the design.

This product is NOT intended for use when complete removal is necessary such as with Free Standing Lace, Heirloom Embroidery and Cut Work embroidery.
