Item #139-103 \$24.95

Digital Tension Gauge by TOWA

Measures force in millinewtons (mN) and gram force units (gf). It is easy to operate, measures both bobbin and top thread tension, offers a low battery warning and will go into “sleep” mode if left alone for 50 seconds. If left alone for five minutes, it will turn itself off. Simply wrap thread around a system of pulleys which read the tension produced. Reads the top thread tension as well as bobbin thread tension when a bobbin case is dropped in to the unit.

For L Style Bobbins

Item #200-60-L **\$129.00**

For M Style Bobbins

Item #200-60-M **\$129.00**

Burmilana Brush Set

Create fur or feathers with these wire brushes and heavy weight Burmilana or BurmilanaCo embroidery thread. Brush downward for fur, similarly to how you would actually brush an animal. If feathers or fur circle the animal’s face, brush from the inside, out. A softer brush and a hard one are included in the set. For additional information on how to produce this technique, visit MadeiraUSA.com.

Item #9467 \$4.95
